Subject: PEG Decision

After reading today's article in the Mountain Express, I'm very disappointed that after monumental opposition and strong legal arguments, the Mayor and Council are moving forward with waivers that are not even close to city code.

The leaders were put in place to make difficult decisions, but at the same time adhere to proper zoning and the majority of your taxpaying residents. Instead, it's outside influence that only benefits you as individuals. While you may be improving some peoples lives, you've essentially created a much bigger problem not to mention reduced property values while most are rising.

You have also failed to investigate something very important. While the Mayor was giving tacit approvals on email for waivers at least 2 months before PEG closed on the property, someone else was also trying to buy it. There is a major conflict here and the statue of limitations have not been exhausted..
